## Work Experience

Full Stack Developer

06/2022 - 05/2023

MoonHoldings LLC.

- Developed the initial frontend using Vue.js, displaying users' Web3 portfolio (wallet balances, coin values, etc.) in a clear and engaging interface.
  - Led the frontend migration to Next.js for improved SEO and performance via server-side rendering.
  - Implemented dynamic graphical views (charts and visualizations) to display live token values and portfolio breakdowns using Chart.js library.
  - Built and maintained backend services with Node.js and Firebase, enabling real-time data updates.
  - Worked closely with the founder to iterate on features like live price tracking, multi-wallet support, and user-friendly dashboard UX.
- 

## Personal Projects

Redbook – Social Media App

PERN Stack | Daisy UI | Socket io | Docker

- Built a feature-rich social media platform with posting, commenting, upvoting/downvoting, and profile customization (profile picture, cover image, bio, etc.).
- Developed real-time one-to-one chat between users using Socket.IO, enabling live messaging functionality.
- Containerized the app with Docker for consistent development and deployment environments.

AI Resume Builder

Next.js 15 | Neon Postgres | Stripe | Vercel Blob | Shadcn UI

- Developed a resume-building web app with multiple paid plans powered by Stripe payment integration.
  - Integrated Generative AI API to summarize resumes and extract work experiences from free-form text input.
  - Used Vercel Blob storage storing profile pictures and Neon Postgres as Database.
- 

## Education

Computer Science & Engineering

National University, Bangladesh

---

## Skills

JavaScript • TypeScript • Tailwind CSS • Shadcn UI • React • NextJS • NodeJS - ExpressJS • MongoDB • Postgres • Prisma • Drizzle ORM • Docker
